NOTICE TO CONTRIBUTORS:

The publishers wish to call your attention to the following instructions for preparing manuscripts for *Cognitive Psychology:* Format and style of manuscript should conform to the conventions specified in the "Publication Manual of the American Psychological Association" (1200 Seventeenth Street, N.W., Washington, D.C. 20036; 1983 Revision), with the exceptions listed below. Please note that it is the responsibility of the author that manuscripts for *Cognitive Psychology* conform to the requirements of this journal.

INFORMATION FOR AUTHORS

Cognitive Psychology publishes original empirical, theoretical, and tutorial papers, methodological articles, and critical reviews dealing with memory, language processing, perception, problem solving, and thinking. This journal emphasizes work on human cognition. Papers dealing with relevant problems in such related areas as social psychology, developmental psychology, linguistics, artificial intelligence, and neurophysiology also are welcomed provided that they are of direct interest to cognitive psychologists and are written so as to be understandable by such readers. There are no maximum or minimum length restrictions for journal articles. Minor or very specialized studies are seldom accepted.

All manuscripts should be submitted to the Editor: **Dr. Earl Hunt, Department of Psychology, NI-25, University of Washington, Seattle, Washington 98195.**

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Cognitive Psychology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

A manuscript submitted for publication is judged by three main criteria: (a) appropriateness of the subject matter for this journal; (b) significance of its contribution to knowledge; and (c) clarity and conciseness of writing. No changes in a manuscript may be made once it has been accepted and is in press.

Form. Type at least double-spaced throughout, including tables, footnotes, references, and figure captions, with 1 inch margins on all sides. Submit four complete copies. Each copy *must* include all figures and tables.

Number the pages consecutively. *Page 1* should contain the article title, author(s) name(s), and affiliation; at the bottom of the page type a short title, not exceeding 35 characters and spaces, and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. The address for correspondence should be given as a footnote to the appropriate author's name. *Page 2* should contain a short abstract, approximately 100 to 150 words in length.

Headings. The organization of the paper must be clearly indicated by appropriate headings and subheadings.

Abbreviations. Do not use final periods with units of measure that are abbreviated (cm, s, kg, etc.) in text or in tables, except for "in." (inch).

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Number displayed equations consecutively, with the number placed in parentheses to the extreme right of the equation. Refer to numbered equations as Equation 1 or say "the first equation." Punctuate equations to conform to their place in the syntax of the sentence.

Footnotes. Use only when absolutely necessary, in which case type the footnotes consecutively, double-spaced, on a separate sheet of paper in the order of their appearance in the text. Use Arabic numbers 1, 2, etc. In the text, refer to footnotes by superscript, 1, 2, etc.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout, on a separate sheet; avoid vertical rules. Supply a short descriptive title below the table number. Type table footnotes, lettered *a, b,* etc., at the end of the table. For further information, see the "Publication Manual," pages 83–94.

Illustrations. All illustrations are considered as figures, and must be supplied in finished form, ready for reproduction. Pages 94–105 of the "Publication Manual" describe concisely the proper preparation of line drawings and of photographs. Plan figures to fit the proportion of the printed page (allowing for the legend under the figure), and take care that lettering on the original is large enough to be legible after a reduction of 50-60%.

Number the figures with Arabic numerals in order of mention in the text. Supply descriptive legends (captions) for all figures. Type these (double-spaced throughout) consecutively on a separate sheet of paper.

Illustrations in color can be accepted only if the authors defray the cost.

References. Cite references in the text by surname of the author, followed by year of publication.

> Smith (1982) found that . . .
> Contrary results (Brown, 1984) have been . . .

When a reference has two authors, cite both names, as (Harris & Cooper, 1980). When more than two are involved, cite the surnames of all authors, with the date, at first mention, but in subsequent citations of the same reference give the surname of the first author followed by *et al.* and the year, as

(Colberg, Matthews, Cooper, 1983)	*first mention*
(Colberg et al., 1983)	*second mention*

In citing more than one publication by the same author or authors in the same year, add suffixes a, b, c, etc, after the year, as (Smith, 1982a) and repeat the letter identification in the bibliography at the end of the reference.

Under the heading REFERENCES, arrange the literature citations in the text in alphabetical order according to the surname of the first author. Do not abbreviate journal names; write them out in full. Full information on forms of literature citations may be found on pages 107–117 of the "Publication Manual."

The following examples show style of capitalization and punctuation for journal articles, books, and edited books:

Biggs, J. B., & Collis, K. F. (1982). *Evaluating the quality of learning: The SOLO taxonomy*. New York: Academic Press.

Donchin, E., Ritter, W., & McCallum, C. (1978). Cognitive psychophysiology: The endogenous components of the ERP. In E. Calloway, P. Tueting, & S. Koslow (Eds.), *Brain event-related potentials in man* (pp. 349–441). New York: Academic Press.

Siegler, R. S., & Robinson, M. (1982). The development of numerical understandings. In H. W. Reese & L. P. Lipsitt (Eds.), *Advances in child development and behavior* (Vol. 16). New York: Academic Press.

Wilkinson, A. C. (1984). Children's partial knowledge of the cognitive skill of counting. *Cognitive Psychology*, **16**, 28–64.

[Use underline for journal names and book titles only.]

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints of each article will be supplied free of charge. Additional reprints can be ordered on the form accompanying the proofs.

Directions in Cognitive Anthropology

Edited by Janet W. D. Dougherty

Twenty-five authors here explore the riches of mind and understanding, contributing to issues of concept definition, acquisition and use of cultural knowledge, modeling systems of cultural knowledge, and the emergent process of understanding social action.

Contents

Cognition and Computation: On Being Sufficiently Abstract
F. K. Lehman (U Chit Hlaing)

Tarahumara Color Modifiers: Individual Variation and Evolutionary Change
Don Burgess, Willett Kempton, and Robert E. MacLaury

Folk Knowledge without Fuzz
Oswald Werner

Exploring the Internal Structure of Linguistic Categories: An Extensionist Semantic View
David B. Kronenfeld, James D. Armstrong, and Stan Wilmoth

THE CREATION OF ORDER

The Utilitarian Factor in Folk Biological Classification
Eugene Hunn

Thai Spirits: A Problem in the Study of Folk Classification
James Stanlaw and Bencha Yoddumnern

Taskonomy: A Practical Approach to Knowledge Structures
Janet W. D. Dougherty and Charles M. Keller

LEARNING: A CONSEQUENCE OF SOCIAL INTERACTION

"Requiem for the Omniscient Informant": There's Life in the Old Girl Yet
James Shilts Boster

Actions Speak Louder than Words
John B. Gatewood

Imitating Ban Chiang Pottery: Toward a Cognitive Theory of Replication
Penny Van Esterik

SCHEMATA AND SEMANTICS: LANGUAGE-BASED SYSTEMS OF CULTURAL KNOWLEDGE

Steps toward an Ethnosemantics of Verbs: Complex Fishing Technique Scripts and the "Unsaid" in Listener Identification
Robert A. Randall

Toward an Encyclopedic Ethnography for Use in "Intelligent" Computer Programs
Benjamin N. Colby

"Commitment" in American Marriage: A Cultural Analysis
Naomi Quinn

Character Terms and Cultural Models
Roy G. D'Andrade

"Bad Ways" and "Bad Talk": Interpretations of Interpersonal Conflict in a Melanesian Society
Geoffrey M. White

EMERGENCE OF UNDERSTANDING: THE MUTUALLY CONSTITUTIVE RELATIONSHIP OF KNOWLEDGE AND EXPERIENCE

Individual Experience, Dreams, and the Identification of Magical Stones in an Amazonian Society
Michael F. Brown

From Situation to Impression: How Americans Get to Know Themselves and One Another
Dorothy C. Holland

How to Grow Schemata out of Interviews
Michael H. Agar and Jerry R. Hobbs

464 pages. Cloth $37.50; paper, $13.95

New titles

The Brain Machine

The Development of Neurophysiological Thought

Marc Jeannerod

Translated by David Urion, M.D.

Drawing upon the many disciplines that have contributed to brain research, the author traces three centuries of ideas about movement and the brain and advances a view of the neural organization of movement that has far-reaching implications for psychology and all neural science.

1 halftone, 15 line illus. $16.95

Vygotsky and the Social Formation of Mind

James V. Wertsch

Drawing extensively on Vygotsky's works, the author presents a program for using Vygotskian theory as a guide to contemporary research in the social sciences and the humanities.
